

KPI Document

Metric definitions, business purpose, and confirmed values

1. KPI Definitions

KPI	Definition	Purpose
Total Tickets	Count of tickets	Overall workload.
Critical Tickets	Critical-priority tickets	Severe workload.
Average Urgency	Average urgency_score	Overall urgency.
Critical Rate	Critical / Total	Relative critical workload.
Medium Tickets	Medium-priority tickets	Elevated non-critical workload.
Security Tickets	security_issue = TRUE	Security exposure.
Work Blocked Tickets	work_blocked = TRUE	Productivity impact.
Business-Critical Tickets	business_critical = TRUE	Business impact.
Deadline Tickets	deadline_present = TRUE	Time-sensitive workload.
Service Unavailable Tickets	service_unavailable = TRUE	Service disruption.
High-Urgency Tickets	urgency_score >= 70	High urgency.

2. Confirmed Overall Values

Metric	Value
Total Tickets	47,837
Critical Tickets	321
Average Urgency	14.02
Critical Rate	0.67%
Security-related Tickets	317
Maximum Urgency Score	85
High-Urgency Tickets	321

3. Power BI Note

MySQL BOOLEAN/TINYINT(1) fields are evaluated as TRUE()/FALSE() in Power BI measures. High-Urgency Tickets uses urgency_score >= 70.
