How to interpret and use the three-page Power BI report

1. Page 1 — IT Support Operations Overview

Question: What does the overall IT support workload look like?

- KPIs: Total Tickets, Critical Tickets, Average Urgency, Critical Rate.
- Visuals: category, priority, critical-by-category, critical-rate-by-category, security-by-category.

2. Page 2 — Priority & Risk Analysis

Question: Why are these tickets risky, and where is operational risk concentrated?

- KPIs: Medium, Security, Work Blocked, Business Critical.
- Visuals: priority by category, urgency by priority, risk indicators, deadlines, work-blocked.

3. Page 3 — IT Action & Investigation

Question: Which tickets should IT investigate or act on?

- KPIs: Critical, Deadline, Security, Work Blocked.
- Visuals: urgency by category, risk profile, high-urgency by category, operational-risk indicators.

4. Interpretation

- Start with KPI cards to understand scale and severity.
- Use category visuals to locate concentration.
- Use risk visuals to understand operational impact.
- Use Page 3 for investigation-oriented prioritization.
